RESUME SNAPSHOT

NAVEEN KUMAR

Business Intelligence Manager | Data Analytics | Analytics Engineering

+91 9650647247 | naveentanwar811@gmail.com | LinkedIn: naveen-kumar-490b59221

Portfolio: https://naveentanwar811.github.io/naveen-portfolio/

10+	6+	Global	Modern
Years Experience	Major Analytics Projects	Stakeholder Exposure	BI + Data Stack

PROFILE IN ONE LINE

BI and data analytics leader who turns operational, marketing, finance, and process data into governed analytics, reliable pipelines, executive-ready insights, stakeholder decisions, and well-managed technical delivery.

MODERN ANALYTICS STACK

AI-assisted application development (Claude AI/CODEX / Vibe Coding), Power BI, Tableau, Looker, BigQuery, PostgreSQL, SQL, Python, Fabric, Databricks, Delta Lake, Airflow-style pipelines, Jira, Advanced Excel, Celonis

BEST-FIT ROLES

Business Intelligence Manager | Data Analytics Manager | Analytics Engineer | Power BI Lead | Process Excellence Lead

LEADERSHIP STRENGTH

Requirement gathering, technical project management, Jira tracking, stakeholder management, client communication, KPI governance, SLA analysis, quality analytics, team leadership, executive presentation.

WHAT I BRING

Executive Analytics
P&L, Marketing campaigns, SLA, quality, and operational performance views for leadership decisions, with delivery planning and milestone tracking.

Data Pipeline Thinking
Fabric, Databricks, BigQuery, PostgreSQL, SQL-ready datasets, refresh design, automation, and Jira-backed delivery coordination.

Stakeholder Delivery
Requirement gathering, Jira/backlog tracking, UAT coordination, dashboard logic validation, executive narratives, and client-ready reporting.

Forecasting & Risk
Python-based SLA risk forecasting with proactive mitigation and Power BI visualization.

Process Excellence
Celonis process mining, bottleneck analysis, query reduction, and SLA adherence improvement.

BI Governance
RLS, scheduled refreshes, subscriptions, KPI definitions, quality checks, scalable templates, and controlled release management.

CAREER PROOF POINTS

- Currently leading BI delivery for Google sales , data pipelines, dashboards, SLA tracking, KPI analysis, and technical project coordination at Concentrix.
- *Built AI-assisted analytics platforms with automated access control, RLS, dashboard orchestration, refresh synchronization, customizable reporting workflows, and conversational chatbot capabilities, significantly reducing dependency on Power BI licensing.*
- Led process excellence and contract lifecycle analytics at Nexdigm, improving KPI visibility, SLA monitoring, and stakeholder decision-making.
- Delivered analytics solutions across P&L, campaign performance, quality, SLA operations, open contracts, forecasting, and process mining.
- Combines hands-on BI development with business analysis, technical project management, client management, automation, and executive communication.

NAVEEN KUMAR

Business Intelligence Manager
+91 96506 47247 | naveentanwar811@gmail.com | linkedin.com/in/naveen-kumar-490b59221 | Portfolio

SUMMARY

• 10+ years of professional experience including Tableau, Power BI, Python, Celonis, Advanced Excel, BigQuery, PostgreSQL, Looker, SQL, data pipelines, Airflow-style orchestration, Jira, Agile delivery, technical project management, and client/stakeholder management.

SKILLS

AI-assisted application development (Claude AI / Vibe Coding), Power BI, Fabric, Power Query, DAX, Power Pivot, Tableau, Looker, BigQuery, PostgreSQL, Databricks, Delta Lake, Data Pipelines, Airflow, Data Analysis, Data Visualization, Data Warehousing, Technical Project Management, Jira, Agile Delivery, Sprint Planning, UAT Coordination, Executive Presentation/Communication, Advanced Excel, SQL, Python, Celonis, Process Mining, Stakeholder Management

PROFESSIONAL EXPERIENCE

Concentrix Technologies | BI & Insights Manager Sep 2026 - Present

- Develop and execute BI & Insights strategy aligned with business objectives, priorities, and reporting requirements.
- Partner with business leaders to understand priorities, identify opportunities, and translate business needs into data-driven solutions.
- Lead, coach, and develop BI Analysts by setting clear goals, performance expectations, and individual development priorities.
- Design and maintain KPI frameworks, dashboards, and scorecards to track business performance and provide leadership visibility.
- Apply advanced analytics to identify trends, opportunities, performance gaps, and risks, translating findings into actionable recommendations.
- Collaborate with Finance, Sales, Marketing, Operations, and Product stakeholders to understand analytical needs and deliver relevant insights.
- Present key findings and recommendations to senior management and act as the bridge between technical data teams and non-technical business stakeholders.
- Oversee implementation and optimization of BI platforms including Power BI, Tableau, Looker, and DOMO, while evaluating emerging analytics technologies and methodologies.

Silverpush Pvt Ltd | Business Intelligence Manager Oct 2024 - Jul 2026

- Leading a Business Intelligence team in a digital marketing process, managing technical delivery, and creating data pipelines, dashboards, and data analysis.
- Maintenance and creation of Power BI, Power Query, DAX, Looker, and Tableau dashboards as per requirement, with Jira-based task tracking and release follow-up.
- Data analysis and dashboard management for a digital marketing team, including SLA and KPI tracking.
- Integrated Fabric and Databricks outputs with BI tools such as Power BI, Tableau, and Looker for real-time analytics and reporting.
- Leveraged Databricks notebooks and Delta Lake to transform and optimize structured and unstructured data.
- Dashboard and report development for data exploration and decision making.

Nexdigm Pvt Ltd | Team Leader Mar 2023 - Jul 2024

- Led a Process Excellence team in a Contract Lifecycle Management process for data management, technical project coordination, and analytics delivery.
- Maintenance and creation of Power BI, Power Query, DAX, Tableau, and Looker analytics as per requirement.
- Data analysis and dashboard management for a CLM team, including SLA and KPI tracking.
- Utilized Fabric and Databricks for data transformation and ETL workflows to support KPI reporting and analytics.
- Implemented and optimized business processes to enhance efficiency and productivity.
- Created and maintained KPI reporting systems to track performance and measure success.
- Designed and developed interactive KPI analytics for real-time monitoring and decision-making.
- Managed client and stakeholder relationships, delivery expectations, UAT feedback, and project priorities to ensure needs were met and expectations exceeded.
- Identified opportunities for business process improvement and implemented strategies to drive change.
- Applied process engineering principles to streamline workflows and eliminate bottlenecks.
- Conducted data analysis to uncover insights and trends that drive informed decision-making.

Pantech, Gurgaon | Freelance Power BI Consultant Nov 2021 - Feb 2023

- Worked as a freelancer for a digital marketing startup called Pantech based in Gurgaon.
- Created Power BI solutions for campaign status tracking, client-specific reporting, content calendar reporting, alerts, and report subscriptions.

Wipro Ltd (Cision) | Senior Executive Jul 2018 - Oct 2021

- Compiled and analyzed statistical data using Advanced Excel and macros.
- Maintained and created Power BI dashboards using Power Query, DAX, Power Pivot, data modeling, SQL, and large operational datasets.
- Prepared reports, analytics, and dashboards for stakeholders and teams.
- Created KPI and Quality Dashboard in Power BI and executive presentations.
- Ensured SLAs and KPIs were met on time and maintained regular performance monitoring for 100% quality.
- Worked with large datasets using SQL and Power Query, contributing to workflows later integrated into big data environments such as Databricks and Fabric.
- Handled knowledge sharing, stakeholder management, project coordination, one-on-one feedback sessions, rosters, leaves, shrinkage, and attrition tracking.

Concentrix Daksh Services India Pvt. Ltd | MIS Executive Feb 2016 - Apr 2018

- Prepared rosters for aligned teams across shifts and managed day-to-day agent activities.
- Prepared performance reports and MIS reports using Advanced Excel.
- Utilized Power BI for data analysis and visualization for the MIS team and automated repeated data analysis tasks.
- Calculated performance metrics such as quality and shrinkage.

Wipro BPS | Technical Support Executive Oct 2014 - Oct 2015

- Provided technical support to clients while maintaining a high level of quality and client satisfaction.
- Followed up with clients to ensure problems were resolved.
- Worked occasionally as team support/SME and coordinated with colleagues for smooth daily operations.

MAJOR PROJECTS

AI-Driven Analytics Platforms- Operations KPI and Sales

- Tech: Node.js, React, SQL, Python, AI-assisted Engineering (Claude AI, CODEX)
- Designed and developed an end-to-end analytics platform using AI-assisted development workflows (Claude AI / vibe coding methodology).
- Reduced dependency on multiple Power BI licenses by creating a centralized analytics access framework.
- Built dynamic access control and role-based dashboard visibility mechanisms for multiple stakeholders.
- Developed automated refresh synchronization and dashboard linking workflows across reporting environments.
- Implemented customizable analytics layers with dynamic filtering and stakeholder-specific dashboard experiences.
- Created a string-detection based conversational chatbot to improve analytics navigation and query handling.
- Enabled scalable BI governance including RLS, refresh monitoring, usage control, and centralized analytics management.

AI-Powered Dashboard Management System- Client's Campaign Performance

- Tech: Node.js, React, SQL, Python, AI-assisted Engineering (Claude AI, CODEX)
- Built a scalable dashboard management ecosystem integrating analytics delivery, governance, and access management.
- Automated dashboard routing, stakeholder access permissions, and refresh orchestration.
- Designed reusable reporting structures reducing repetitive BI development efforts, like easy string-based customizations.
- Improved reporting scalability and reduced operational dependency on traditional BI licensing structures.

Management P&L; Analytics | Power BI, BigQuery, PostgreSQL, SQL, Jira

- Built comprehensive management analytics to visualize Profit & Loss performance across four business verticals.
- Incorporated weekly, monthly, and annual views to monitor sales, revenue, targets, and profitability KPIs.
- Designed interactive views with forecasting features, trend lines, RLS, custom date slicers, target comparisons, YoY/MoM growth trends, export-to-PDF, and subscription delivery.
- Integrated ERP, sales databases, BigQuery, and PostgreSQL-ready datasets to automate financial reporting and reduce manual data handling.
- Collaborated with finance and operations teams to validate data accuracy, manage delivery checkpoints, coordinate UAT, and align dashboard logic with financial reporting standards.

Client Campaign Analytics | Power BI Embedded, Looker, BigQuery, Agile Delivery

- Developed multi-page analytics to track digital marketing campaign performance across multiple clients using a unified template.
- Analyzed impressions, clicks, conversions, CTR, spend, ROI, and client-specific KPIs with dynamic customization per client.
- Designed campaign-level, channel-level, and ad-group level analysis with drill-through, tooltip-enabled visuals, conditional formatting, and client-specific privacy controls.
- Enabled scheduled data refreshes, subscription-based delivery, stakeholder demos, feedback tracking, and release handover for client analytics pages.

Quality Analytics | Power BI, PostgreSQL, Data Quality

- Created comprehensive quality analytics to monitor the Quality Matrix and performance.
- Developed overview, location, employee, sector, individual agent, and monthly change pages for quality, errors, and request trends.
- Aligned the solution with cross-functional business objectives and maintained it for continued relevance.

SLA Operations Analytics | Tableau, SQL, Airflow-style Pipelines, Jira

- Developed Tableau-based SLA analytics for real-time monitoring of client SLAs.
- Used Tableau Server for data import and dynamic updates, with specific visualizations for individual SLAs, category-wise and sector-wise analysis, signature time, delays, and volume forecasting.
- Designed for scalability as SLA requirements changed, including refresh patterns suited to pipeline scheduling, delivery tracking, and controlled rollout.

Open Contracts Analytics | Tableau, SQL

- Used client Tableau Server for dynamic Open Contracts analytics.
- Categorized and monitored unexecuted contracts by category and sector, integrated monthly closure targets, and visualized open items across contract lifecycle stages.
- Provided granular insights into individual contracts and tracked employee involvement in the contract lifecycle.

Performance Forecasting | Python, Power BI, Data Pipelines, Technical PM

- Developed an SLA forecasting model using Python libraries such as scikit-learn, pandas, and matplotlib.
- Designed the model to proactively measure risk of SLA non-compliance and prevent potential monetary losses from client payments.
- Visualized Python-generated forecasts in Power BI for stakeholder communication, project review discussions, and client decision-making.

Process Mining Query Reduction | Celonis, SQL, Process Mining

- Leveraged Celonis Process Mining to pinpoint bottlenecks across categories and teams within the process.
- Identified query volumes impeding SLA achievement and collaborated with the client on an action plan.
- Resolved query-related challenges, improved client experience, and strengthened SLA adherence.

KPI and Quality Analytics | Power BI, SQL Server

- Developed KPI and Quality analytics for the Market Research team using Power BI and client SQL Server data.
- Monitored SLAs, quality scores, missed SLAs, individual and team performance, top performers, and project completion timeliness.
- Translated complex data into actionable insights for informed decision-making, project governance, and improved transparency.

PROFESSIONAL CERTIFICATION

- Google Data Analytics Professional Certificate
- Power BI: Data Visualization
- Six Sigma Certification
- Python Developer Certification
- Tableau Essentials

EDUCATION

- IGNOU - Master of Business Administration (HRM), 2021
- World Institute of Technology (MDU) - Bachelor of Technology, 2013
